Forecast For Northwest England
Issued by Met Office Exeter
at 0400 on Sunday 12 Sep 2021

++ Valid for broadcast between 0600 and 1800

Headline:
A fine and dry start but becoming cloudy later.

Today:
A largely dry start with patchy cloud, allowing for some sunny spells and the odd isolated shower. Cloud then widely builds through the afternoon, with this accompanied by rain moving into southern areas later on. Maximum temperature 18 deg C (64 deg F).

Tonight:
Remaining cloudy for all overnight, with some low cloud and hill fog in places. Rain becomes more widespread through the night, with heavier outbreaks likely at times in the south. Minimum temperature 10 deg C (50 deg F).

Monday:
Another cloudy day, with rain remaining widespread and heavy at times through the morning; Cumbria seeing the best of any dry spells. Becoming drier into the afternoon as rain eases. Maximum temperature 18 deg C (64 deg F).

Outlook for Tuesday to Thursday:
A wet start Tuesday, with showers and spells of rain, before becoming drier later. Drier and brighter Wednesday and Thursday with the odd isolated shower; feeling warm in any sun.
